

# GOGADA PRAMEELA

Vizianagaram, Andhra Pradesh | +91 70938 11130 | [prameelagogada4@gmail.com](mailto:prameelagogada4@gmail.com)

## SUMMARY

Final-year B.Tech Electronics and Communication Engineering student (2027) who builds software with C, Python and AI-assisted development (vibe coding), reviewing and testing every AI-generated change. Building a Next.js portfolio website and a Python test-automation project. 98% in SSC. Seeking an entry-level software engineering role.

## EDUCATION

|                                                          |                 |
|----------------------------------------------------------|-----------------|
| <b>B.Tech, Electronics and Communication Engineering</b> | 2027 (expected) |
| Avanthi Institute of Engineering & Technology            | 75%             |
| <b>Intermediate (12th)</b>                               | 2022            |
| Punyagiri Junior College                                 | 65%             |
| <b>SSC (10th)</b>                                        | 2020            |
| Z.P.H. School, Jami                                      | 98%             |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                        |

| <ul style="list-style-type: none"><li>Writing an automated Python test suite (pytest) that injects faults such as invalid values and missing messages, and generates PASS/FAIL reports.</li><li>Developing a C program on Linux that decodes vehicle data (speed, RPM, temperature) from a DBC file and flags out-of-range values.</li></ul> |                     |

## TECHNICAL SKILLS

- Programming:** C, Python, MATLAB; JavaScript (learning)
- Web (learning through portfolio):** Next.js, React, HTML, CSS, Tailwind CSS
- AI-assisted development (vibe coding):** Claude, GitHub Copilot; writing clear prompts, reviewing, testing and debugging AI-generated code
- Tools:** Git, GitHub, Linux, VS Code, pytest

## LANGUAGES AND INTERESTS

- Languages:** English, Telugu, Hindi
- Interests:** Space technology, exploring new technologies
